

## vue中的计算属性和侦听器

```
<div id="root">
  姓 : <input v-model="firstName">
  名 : <input v-model="lastName">
  <div>{{fullName}}</div>
  <div>{{count}}</div>
</div>
<script>
  new Vue({
    el: "#root",
    data: {
      firstName: "",
      lastName: "",
      count: 0
    },
    computed: {
      fullName: function(){
        return this.firstName + ' ' + this.lastName
      }
    },
    watch: { // 侦听器侦听数据的变化
      fullName: function(){
        this.count++;
      }
    }
  })
}
```
